

GLP CREATION II 1024

The Creation II 1024 is the second lighting controller in GLP's new Creation II series. The Creation II 1024 is just at home controlling productions of up to 800 fixtures with ease, and offering exceptional usability for both fixed and temporary installations. Features, such as integrated media server functionality, multi-console networking, a comprehensive effects generator, a powerful fanning engine, full HTP/LTP configuration, individual parameter timings, fixture cloning, a touch screen color picker, timecode input and output, and a multi-functional, user definable button and fader configuration, make it a flexible and powerful state of the art lighting console.

- Embedded Linux operating system
- Fast boot time of less than 60 seconds
- Dedicated media server section
- Comprehensive effects generator
- Full ArtNet compatibility
- Built-in library editor
- Extensive fixture library
- Multi-console networking
- Total flexibility of HTP or LTP controls
- User definable fader and button setup
- 16bit operation throughout
- Comprehensive list of connectivity options
- Highly intuitive operation
- Highly reliable industrial hardware
- Affordably priced
