

GLP CREATION II 4096

The Creation II 4096 is the first lighting controller in GLP's new Creation II Series. Continuing in the spirit of the original Creation controller, the Creation II impresses with a powerful feature set and solid hardware platform whilst keeping full focus on a simple to operate user interface.

Thanks to its intuitive interface and the 5.7 inch full color touchscreen, it is possible to control even large and complex setups in a simple and efficient manner.

Features, such as integrated media server functionality, multi-console networking, a comprehensive effects generator, a powerful fanning engine, full HTP/LTP configuration, individual parameters timings, fixture cloning, a touch screen color picker, timecode input and output, and a multi-functional, user definable button and fader configuration, make it a flexible and powerful state of the art lighting console.

- Embedded Linux operating system
- Fast boot time of less than 60 seconds
- Dedicated media server section
- Comprehensive effects generator
- Full ArtNet compatibility
- Built-in library editor
- Extensive fixture library
- Multi-console networking
- Total flexibility of HTP or LTP controls
- User definable fader and button setup
- 16bit operation throughout
- Comprehensive list of connectivity options
- Highly intuitive operation
- Highly reliable industrial hardware
- Affordably priced
