

GLP Air Dome 400 + 600

The GLP Air Domes feature an easy installation for any small up to larger fixture and protects them safely from rain and other influences. The mains in & out together with 3pin and 5pin XLR sockets for DMX ensure the compatibility with multiple fixtures.

Its solid rubber feet guarantee safe grip on any surface and multiple hanging options, incl. attachment points for a safety wire ensure a versatile usage.

A pressure sensor is included so that should the Air Dome lose pressure it cuts off the power to the fixture to ensure no damage can come to the fixture or the Air Dome.

GLP Air Dome 850 + 850 Profi

The GLP Air Dome 850 is the biggest of the Air Dome series and comes equipped with wheels.

Next to the standard Air Dome 850 there is also a Air Dome 850 Profi available with higher air pressure for usage of Aircones up to 10m high.

Big advantage of the complete Air Dome series is that the compact domes are disposable, so when damaged they can be replaced efficiently and affordably.

GLP Air Dome BAR 500 + 1000

The GLP Air Dome BAR 500 and BAR 1000 are the latest models from the Air Dome series suited for the X4 BARs from GLP and other bars to protect them safely from rain and other environmental influences..

The BAR 500 is suited for bars up to 50cm and the BAR 1000 for bars up to 100cm.
The Air Dome BARs are equipped with the same connectivity as the rest of the Air Domes.

GLP Air Dome Hanging Kit

Different Hanging Kits are available for all Air Dome models for hanging upside down.

The Hanging Kits include two halfcoupers for connecting to 50mm pipe.
