

FUSION 2

The Fusion 2 marks the begin of a new era in Linear Lighting.

Because of its intelligent connector system the Fusion 2 creates seamless light lines — horizontal or vertical, indoor as well as outdoor.

The most so called „bars“ are too weak to produce a homogenous area light. With the Fusion 2 it is no problem to change the reflection angle between beam to wide flood or also asymmetrical. Even when using diffuser plates the Fusion 2 creates more than enough light power.

Light lines have become an important part of modern stage designs. With the Fusion 2 you finally get a tool for such an application that even works fanless. Thanks to that feature the Fusion 2 is as flexible as possible.

No matter if used in a theatre or on a concert — in- and outdoor - The Fusion 2 is the right choice.
