

Supernova RGBW

The Supernova RGBW is a universal versatile and offers a maximum field of applications as stage light or backlight, in TV studios or with his protection class IP65 for all rough outdoor installations.

The, incredible homogeneous pixel-free light output of 60.000lm, paired with an extremely light luminance make the Supernova RGBW to everybody`s darling and a jack of all trades.

A beam angle of 110° and IP65 protection makes it perfect to use as RGBW flood, and all type of installations.

But with the 60.000lm output the Supernova RGBW can also easily be used as a blinder or as a strobe.
