

EXO Beam 10

- 90W White 7500K LED
- 0,1° Beam Angle, 1° Field Angle
- 160mm Front Lens
- Color Wheel
- Hybrid Gobo Wheel
- Two overlapping prisms
- Frost
- IP65
- True1 & XLR-5 in/out
- 354 x 379 x 524mm, approx. 22kg

The Exo Beam is a powerful IP65 rated moving head with a beam angle of just 0.1°, generating a sharp beam that can be seen for long distances.

It features a single, powerful and highly efficient 90W, 7500K white light LED engine.

With its' 160mm front lens, the fixture features an incredible 0.1° beam angle and a field angle of just 1° along with incredibly fast pan and tilt movements and a range of additional effects, combining to give incredible mid air effects – either indoor, or out.

The fixture has a robust die cast housing which combined with the IP65 rating make the Exo Beam ready for even the worst of outdoor conditions.

EXO Beam 10

THE FIRST IP65 MOVING HEADS FROM GLP IN THE FUSION SERIES

- Incredible Beam angle of 0,1°, field angle 1°
- Fast Pan & Tilt movements
- 191.000 Lux @5m
- Due to LED, less safety distance to objects, only 1m
- High Efficient 90W LED Engine with 7000K
- High Grade 160mm Front Lens
- Two Rotating Prism with Overlap for multiple aerial effects
- A hybrid Gobo Wheel with static and rotating gobos
- One Colour Wheel
- Motorized Focus
- Front Head Mounting with magnetic holders and M3 insert threads for barndoor/filters/anti-glare
- Anti-Fog System with additional pressure vent system
- W-DMX optional
- Battery-buffered OLED Display for easy setup
- IP65 classification for true outdoor use
- True1 & XLR-5 connection
- RDM compliant
- Tough Die-Casting Housing
- Only 22kg
